Subject: Fair Act and A-76

I do not understand how Private Industry can perform Underpaid Government jobs for less than currently being paid. If Mandatory Outsourcing becomes a reality, how is it that Private Industry can perform 420 thousand Government jobs for less money, particularly, when Government workers are under paid by a substantial margin, add to that Overhead and Profit, fringe benefits, etc. So, the A-76 study will show that we can do it for less, but we knew that before we started. I' must be missing something here.

I'm concerned about quality. If it's not in the contract, who will do the little extra things, we all do that are not in the job description.
