Dear Office of Information and Regulatory Affairs Hunt:

Greetings:

I am writing to express concern regarding the recent OMB Draft Guidelines for the Conduct of Regulatory Analysis and the Format of Accounting Statements, which essentially determines that saving the life of an elderly person is worth less than saving the life of a younger person.

The analysis proposes to devalue the life of a human over 70 to 2/3 that of the rest of the population and lowers the established EPA price tag of a human life from \$6.1 million to \$3.7 million.

I believe that this is a mere pretext to cut the value of health and safety standards in order to protect the industries that stand to gain from this White House initiative.

If analysis is fully applied, regulations for air pollution, toxic waste cleanup, food labeling and other quality of life issues could be weakened or not even implemented at all; and our senior citizens will feel the brunt of it since their health is the most vulnerable to dirty air and unhealthy food.

Please ensure that this draft is not accepted in its current form.

Sincerely,

Carol Moore
